SUMMARY

- Senior Frontend Engineer (7+ years) developing **React, Vue.js, Next.js & AWS** web apps.
- Led frontend system design across micro-frontends and monorepos in async, globally distributed teams.
- Resolved a revenue-critical performance issue by reducing frontend RAM usage by **90% (2GB to 200MB)** **safeguarding ~\$60K MRR**, and built a custom calendar system that avoided \$100K+ in platform rewrites.
- Vetted as **Top 3% of global talent** by Tiptal & Turing.

CORE SKILLS

React, Vue.js, Next.js, AWS, TypeScript & JavaScript, Storybook, Web Sockets, Chromatic, Cypress, Web Performance, Design Systems, Stencil.js, Micro-Frontends, GraphQL, Redux, Zustand, CI/CD, SSR/SSG, Web Vitals

EXPERIENCE

Senior Frontend Engineer

Feb 2021 - Present

US based Startups & Enterprises (via Tiptal & Turing) | Remote - Contractor

IMPACT HIGHLIGHTS:

- Built and scaled a 100+ component, framework-agnostic design system (Stencil.js), enabling consistent UI across multiple micro-frontends and reducing duplicate engineering effort across teams.
- Owned architecture and delivery for revenue-critical features; acted as primary decision-maker for performance, tooling, and component design across multiple repos.
- Reduced frontend RAM usage by 90% (2GB → 200MB) in a production enterprise app by eliminating render leaks, virtualizing heavy views, and enforcing lifecycle cleanups, preventing churn of key customers contributing ~\$60k MRR.
- Designed and shipped a custom high-performance calendar view, replacing brittle third-party integrations and saving \$100k+ in projected redevelopment and migration costs

KEY CLIENTS: [Meltwater](#) (Social Media Intelligence), [JiffyT-Shirts](#) (High-Traffic eCommerce), [Akasa Air](#) (Airline's Loyalty Platform)

Frontend Engineer

Aug 2019 - Feb 2021

Classic Informatics Pvt Ltd. | Remote - Full Time

- Owned architecture for EU clients, delivering React applications with a focus on performance, scalability, and clean component design.
- Built GDPR-compliant fintech dashboards and real-estate platforms integrating Stripe, Maps APIs, and real-time workflows.

Frontend Engineer

Jun 2019 - Aug 2019

Credit Culture | On Site - Full Time

- Built lending workflows using React + AWS Serverless (Lambda, API Gateway, DynamoDB).
- Implemented OAuth-based SSO and secure session management in a high-compliance environment.

Frontend Engineer

Feb 2019 - May 2019

AgroHub | Remote - Contractor

EDUCATION

Bachelor of Computer Applications (Computer Science)

2016 - 2019

Panjab University, Chandigarh
